Neria Mordekhay Lister

Frontend Developer

+972-53-759-7777 | nerialister@gmail.com | LinkedIn | Portfolio

Objective

Results-driven Frontend Developer with 4 years of experience in building scalable web applications using React, JavaScript/TypeScript, and Node.js. Passionate about creating seamless user experiences and collaborating across teams to deliver impactful solutions.

Experience

Radware LTD | via Abra   Sep 21, 2024 - Oct 1, 2025
Front End Developer

Frontend Developer in the Cloud Security team at Radware, focusing on building advanced monitoring and threat analysis platforms for WAF, DDoS, and Bot protection services.

Tech Stack: React, JavaScript, Node.JS, MongoDB, REST, Docker, GCP, Bitbucket, Micro-frontend (React + NX Module Federation) and Micro services architecture, MCP servers, Playwright

- Built advanced monitoring and threat analysis platforms for Web Application Firewall (WAF), DDoS mitigation, and Bot Protection products.
- Participated in Agile ceremonies including PI Planning, Daily Stand-ups, and Sprint Reviews as part of a Scrum-based development team.
- Integrated frontend components with RESTful APIs and real-time data streams, in collaboration with backend teams using Node.js, Express, and MongoDB.
- Led frontend development of a threat intelligence dashboard visualizing hacker activity trends, attack vectors, and target countries.
- Implemented custom event tracking and analytics using Google Tag Manager and Google Analytics.
- Contributed to the migration to Material UI, ensuring smooth adoption and improved UI consistency
- Led the design alignment and UI unification across teams working on the company's core Cloud Group project
- Executed automated tests using an MCP server integrated with Playwright to validate system behavior and reliability

Makor Group | Enigma Securities   Sep 18, 2021 - Sep 19, 2024
Full-Stack Developer

Notable Projects:

Tech Stack: React, TypeScript, Redux, Redux Toolkit, MaterialUI, JavaScript, Node.js, Express, MongoDB, MySQL, Redis, RabbitMQ, WebSocket, REST APIs, Git, AWS.

- **Bond Auction Trading Platform** - Contributed to developing a web app for bond auctions using a microservices architecture (RabbitMQ, Redis, Node.js, React.js).
- **FX and FI Responsive Trading Web App** - Developed a responsive web app for actual trades and efficient communication between traders and departments.
- **End-to-End Product Development** - Played a key role in the complete product lifecycle, from characterization to ongoing maintenance. In-House Customer Service Messenger and Ticketing System - Built an internal customer service system using ReactJS and web sockets for crypto asset traders.
- **Server Call Time Statistics Web App** - Designed a web app for the CTO to calculate real-time server call statistics.
- **Enigma's Main Product Development** - Contributed to developing Enigma's primary product, aiding institutional clients in crypto asset trading.

  Daily Responsibilities -
- Managed technology infrastructure, collaborating closely with the product team.
- Actively participated in team meetings, providing insights on deadlines, design, and enhancements.
- Optimized system performance and reliability through close collaboration with backend engineers.

Education

Technion - Israel Institute Of Technology

Full-Stack Web Development

Volunteering

Code For Israel   2022
ReactTS Developer

Part of an R&D team developing a web app for the Ministry of Education to help teachers share educational initiatives.

Help App   April 2017
Humanitarian Worker

Humanitarian Delegation in orphanage house in Uganda, Africa. Built and reconstructed the orphanage house while teaching the children
